SUMMARY

Best Graduate of Information Systems (GPA 3.95/4.00) from Universitas Nurdin Hamzah and a Distinction Graduate from Bangkit Academy by Google. A passionate Software Engineer and Game Developer, currently contributing as an IT Intern (Asisten Pranata Komputer) at BPS Kota Jambi. Combines academic excellence with practical expertise in Android Development (Kotlin) and AI Integration. Proven track record of leadership in laboratory management and educational projects. Highly disciplined, fast learner, and eager to drive impactful solutions in a dynamic technology team.

EDUCATION

Universitas Nurdin Hamzah <i>Bachelor of Information Systems</i> - Current GPA: 3.95 / 4.00 - Award & Focus: Best Graduate (Wisudawan Terbaik). Focused on software engineering, database management, and business logic. Collaborated with lecturers on academic digitalization projects.	Dec. 2025 <i>Jambi</i>
Bangkit Academy by Google, GoTo, Traveloka <i>Mobile Development Cohort</i> - Achievement: Graduated with Distinction (Top tier of the cohort). - Focus: Mastered Android development (Kotlin, Jetpack Compose, clean architecture, dependency injection) and developed soft skills in project management and professional communication.	Feb – Jul 2024 <i>Remote</i>
Kampus Merdeka (Teacher Training) <i>Educator Participant</i> Studied pedagogical competence, student psychology, and the “Merdeka Curriculum” framework to implement inclusive and effective learning strategies.	February 2023 <i>Remote</i>

WORK EXPERIENCE

Badan Pusat Statistik Kota Jambi <i>IT Intern – Asisten Pranata Komputer</i> - Supporting IT infrastructure and data processing systems to ensure smooth operations for statistical data management. - Assisting in hardware/software troubleshooting and maintaining technical documentation for internal systems.	Aug 2026 – Present <i>Jambi</i>
Timedoor Academy <i>Teacher</i> - Instructed students in programming logic (Roblox Studio, Construct 3, Python) using project-based learning methodologies. - Impact: Mentored 20+ students to complete complex projects (88% “Excellent” ratings) and boosted digital literacy confidence, resulting in a 93% satisfaction rate from parents and students.	Sep 2024 – Sep 2025 <i>Jambi</i>
Lembaga Pengembangan Teknologi Informasi dan Komunikasi Universitas Nurdin Hamzah <i>Laboratory Assistant</i> - Managed the maintenance of hardware and network infrastructure across university computer labs to ensure zero downtime. - Assisted lecturers during technical sessions and enforced laboratory safety protocols.	Aug – Oct 2023 <i>Jambi</i>

- Collaborated with staff to integrate technology into the curriculum, yielding a 10% improvement in literacy and numeracy.
- Redesigned the library into an interactive space and digitalized school information dissemination to reach parents efficiently.

PROJECT WORKS

BAST V2 (Badan Pusat Statistik Kota Jambi) | [GitHub](#)

Aug 2026

*Fullstack Web Developer**Jambi*

- Overview: Engineered a web-based application to automate the generation of Berita Acara Serah Terima (BAST) and partner contracts for BPS Kota Jambi.
- Tech & Impact: Built with Vite (Client) and Node.js/Express (Server). Replaced manual administrative tasks by processing heterogeneous Excel data into dynamically generated Word documents packaged in ZIP archives. Implemented a modern UI/UX aligned with the institution's visual identity (navy blue), significantly improving document processing efficiency.

Double A Calorie (A2Bot) | [GitHub](#)

Dec 2025

*AI Engineer & Backend Developer**Jambi*

- Overview: Developed an AI-powered WhatsApp assistant that automates daily calorie tracking via natural language.
- Tech & Impact: Integrated Google Gemini 1.5 Flash to recognize food and estimate calories. Built with Node.js, Baileys, and Dotenv. Features multi-user tracking in groups using a local JSON database.

Virtual Class Android App | [GitHub](#)

May 2025

*Native Android Developer / Final Year Project**Jambi*

- Overview: Engineered a comprehensive offline-capable distance learning app for UNH students and lecturers featuring Real-time Automatic Attendance and assignment management.
- Tech Stack: Kotlin, MVVM Architecture, Koin, Coroutines & Flow, Room Database, and Jetpack Navigation.

Valorant Agent Android | [GitHub](#)

Sep 2024

*Android Engineer / Course Submission**Remote*

- Overview: Developed a high-performance, modular Android application enforcing security best practices and smooth UX.
- Tech Stack: Clean Architecture, RX/Coroutines Flow, Dagger/Koin, CI/CD Pipelines, MapBox, Lottie, Firebase Crashlytics.

CERTIFICATIONS, SKILLS & INTERESTS

▪ Certifications:

- Best Graduate (Wisudawan Terbaik) - Universitas Nurdin Hamzah.
- Distinction Graduate - Bangkit Academy (Mobile Development).
- Google: Android Developer Expert, Machine Learning for Android.
- English for Business Communication.

▪ Technical Skills:

- Languages: Kotlin, Node.js, SQL, Python, Pascal.
- Mobile Engineering: Android Native, MVVM, Clean Architecture, Koin/Dagger.
- Web, AI & Backend: Express.js, Vite, Google Gemini AI Integration, WhatsApp API (Baileys), RESTful APIs.
- Tools: Git/GitHub, Android Studio, Firebase, CI/CD.

▪ Soft Skills:

- Adaptive Learning, Critical Thinking, Public Speaking/Teaching, Project Management.

▪ Interests:

- Education Technology, Game Development, Content Creation (Streaming/Podcasting), Writing.
